ISBN(softcover): 978-3-0364-0164-5 ISBN(eBook): 978-3-0364-1164-4

Table of Contents

Preface, Committee, Sponsor

Chapter 1: Physical Metallurgy

Effect of Rare Earths on the Precipitation Behavior of High Temperature Deformation Inhibitors in the Ferrite Zone of Oriented Silicon Steel
S. Hu, Z.L. Jin, Z.W. Wu, T. Li, W. Li and Y.Q. Hu 3

Numerical Modelling of Thermo-Mechanical Processes in Steels - An Overview and Recent Progress
A. Pohjonen, J. Ilmola, O. Seppälä and O. Leinonen 11

Electronic Structure of the Non-Stoichiometric $L2_1$-Type $Mn_{1.75}Co_{1.25}Al$ Heusler Alloy
A.V. Lukoyanov, E.I. Shreder and V.V. Marchenkov 19

Chapter 2: Composites

Mechanical Properties of Epoxy-Based Hybrid Composites Reinforced by Fabrics and Powder Fillers
K. Mizera, K. Sałasińska, E. Irzmańska, N. Litwicka, P. Kozikowski and A. Gajek 27

Dynamic Compression Simulation of Magnetorheological Elastomer Using Bouc-Wen Hysteretic Model
M.F. Jaafar, F. Mustapha and M. Mustapha 33

Chapter 3: Construction 3D Printing

Soil-Cement Matrices for Additive Construction: 3D Printing System Validation and Printing Tests
G. Silva, V. Burgos, R. Ñañez, S. Kim, G. Ruiz, M.A. Pando, R. Aguilar and J. Nakamatsu 43

Evaluation of Chitosan and Potato Starch as Stabilizers to Improve the Mechanical and Water Durability Properties of Printable Earth-Based Matrices Reinforced with Sisal Fibers
D. Zavaleta, R. Ñañez, G. Silva, S. Kim, G. Ruiz, M.A. Pando, J. Nakamatsu and R. Aguilar 51

Preliminary Experimental Evaluation of Buildability Improvement Methods for Concrete for 3D Printing
J. Baldoceda, G. Silva, S. Kim, G. Ruiz, M.A. Pando, J. Nakamatsu and R. Aguilar 61

Chapter 4: Equipment in Microelectronic Production

The Study of Velocity Field in Front Opening Unified Pod by CAE
Y.T. Lin, S.S. Hwang and J.A. Zhu 71
