The EU Emission Trading Scheme

Aspects of Statehood,
Regulation and Accounting

PETER LANG

Contents

List of Figures	XI
List of Tables	XIII
List of Abbreviations and Symbols	XV

1	Introduction	1
1.1	Motivation for the Research	1
1.2	Structure of the Analysis	4
2	Transformation of Environmental and Energy Policies in the European Union	7
2.1	Towards a Governance Framework for Policy Analysis	7
2.2	Environmental Regulation	13
2.2.1	Economic Theory of Pollution Control	13
2.2.1.1	General Setting	13
2.2.1.2	Traditional Frameworks of State Intervention	14
2.2.1.3	Negotiations as the Communitarian Approach	17
2.2.1.4	Shift to Markets for Emissions	18
2.2.2	Design of the EU Emission Trading Scheme	21
2.2.2.1	European Legal Framework	21
2.2.2.2	National Allocation Plans: The German Case	28
2.2.2.3	Supply of and Demand for Emission Rights	30
2.2.2.4	Outlook on the Future Design of the EU ETS	36
2.2.3	New Governance Modes for Pollution Control: An Explanation	39
2.2.4	Concluding Remarks	43
2.3	Energy Market Regulation	45
2.3.1	Economic and Legal Background of European Energy Markets	45

2.3.2	Reasons for Transformations in Energy Market Governance	50
2.4	Are the New Environmental and Energy Policies Cases of Regulatory Capture?	55
2.5	Some Resulting Questions for Empirical Research	59
3	Mapping Emission Rights to Accounting	61
3.1	Framework for Accounting Analysis	61
3.2	Consequences for Performance Reporting	62
3.2.1	Functions of Management Accounting	62
3.2.2	Emission Rights as Accrual Costs	66
3.2.2.1	Cost Incurrence	66
3.2.2.2	Accrual Costs in Stewardship and Decision Making Settings	68
3.2.3	Emission Rights as Imputed Costs	71
3.2.3.1	Determination of Quantities	71
3.2.3.2	Measurement	76
3.2.3.3	Full Cost Accounting: Treating Emissions as Externalities	77
3.2.3.4	Imputed Costs in Stewardship and Decision Making Settings	81
3.2.4	Concluding Remarks	84
3.3	Consequences for Financial Accounting	86
3.3.1	Functions of Financial Accounting	86
3.3.2	The Accounting for Emission Rights Debate	88
3.3.3	Accounting Alternatives	91
3.3.3.1	Major Treatments	91
3.3.3.2	Further Treatments and Recent Proposals	101
3.3.4	Concluding Remarks	103
3.4	Some Resulting Question for Empirical Research	104

4	Capital Market Implications of Trading in and Accounting for Emission Rights	107
4.1	Development of Research Questions	107
4.2	Models in Empirical Capital Market Research	112
4.2.1	Detecting Pricing Effects	112
4.2.2	Detecting the Relative Usefulness of Accounting Information	114
4.3	Specification of the Models Employed	116
4.3.1	Pricing Effects of Emission Rights	116
4.3.2	Interaction of Energy and Allowance Markets	118
4.3.3	Usefulness of Accounting Information on Emission Rights	119
4.4	Data and Sampling	123
4.5	Pricing Effects of Emission Right Returns in the Power Sector	128
4.5.1	Results	128
4.5.2	Additional Analyses	131
4.5.2.1	Control Group	131
4.5.2.2	Commodity Price Impact	132
4.5.2.3	Implications of Power Generation	135
4.5.2.4	Market and Regulatory Conditions	137
4.5.3	Concluding Remarks	140
4.6	Interacting Effects of Energy and Allowance Markets	141
4.6.1	Results	141
4.6.2	Additional Analyses	143
4.6.2.1	Implications of Energy Market Transformation	143
4.6.2.2	Differentiating Early and Late Liberalisation Adopters	146
4.6.3	Concluding Remarks	147
4.7	The Relative Usefulness of Accounting Treatments for Emission Rights	149
4.7.1	Results	149
4.7.2	Additional Analyses	153

4.7.2.1	Controlling for Risk Factors	153
4.7.2.2	Controlling for Emission Price Changes	157
4.7.2.3	Comparing Modelled with Empirical Data	161
4.7.3	Implications for Accounting Standard Setting	164
4.7.3.1	Final Evaluation of Effective and Proposed Accounting Treatments	164
4.7.3.2	Policy Implications	165
5	Conclusions	169
