

Antje Köckeritz

Distributing medical resources

An application of cooperative
bargaining theory to an allocation
problem in medicine

PETER LANG

Table of contents

Table of figures	11
Table of abbreviations	13
Table of symbols	15
1 Motivation	19
2 Scarce resources in the German health system – an overview	23
2.1 Introduction to the German statutory system	23
2.2 Examples of medical bargaining situations	28
2.3 Interdisciplinary discussion of scarce medical resources	33
2.3.1 Interconnectedness	33
2.3.2 Notations and Methods from health economics	34
2.3.3 Results from FOR 655 „Prioritizing in medicine“	36
2.3.4 A specific medical allocation problem	40
2.4 An introduction to cooperative bargaining theory	41
2.4.1 The notion of bargaining	41
2.4.2 The Nash concept	44
2.4.3 The Nash bargaining solution	46
2.4.4 The Kalai/Smorodinsky bargaining solution for two groups of patients ($n = 2$)	49
2.4.5 The Kalai/Smorodinsky bargaining solution for more than two groups of patients ($n > 2$)	51
3 A cooperative bargaining model for two groups of patients	55
3.1 Introduction	55
3.2 Definition of an allocation problem	56
3.2.1 An example	59
3.2.2 A cooperative bargaining problem of chances of success	62
3.3 Axiomatic characterization and solution concepts	65
3.4 Results and Conclusion	70
4 A cooperative bargaining model with two patients groups, their individual needs and different group size	73
4.1 Introduction	73
4.2 The model	74
4.3 A cooperative bargaining model	81
4.4 Properties and solution concepts from cooperative bargaining theory	83

4.5 Results and conclusion 92

5 Different types of monotonicity in a cooperative bargaining model of
distributing medical resources 97

5.1 Introduction..... 97

5.2 Monotonicity in patients groups 98

5.3 Monotonicity in number of patients groups 101

5.4 Resource monotonicity 108

5.5 Monotonicity in claims 115

5.6 Results 121

6 Results and outlook 123

6.1 Theoretical results of the medical allocation problem 123

6.2 Interpreting the results within a medical context 126

6.3 Outlook 130
