ISBN(softcover): 978-0-87849-907-6 ISBN(eBook): 978-3-0357-0407-5

Table of Contents

Preface

Modelling of Beam-on-Beam Collisions
T.X. Yu, A.J. Pontes, N.M. Neves and H.H. Ruan 1

Discrete Dislocation Plasticity
A. Needleman and E. Van der Giessen 13

Applications of a Phenomenological Plasticity Model with Non-Normality Effects
V. Tvergaard and M. Kuroda 25

Numerical Modelling of Large-Strain Phenomena in Polycrystalline Solids
K.W. Neale, K. Inal and P.D. Wu 35

A Model of Large-Strain Cyclic Plasticity and its Application to Springback Simulation
F. Yoshida and T. Uemori 47

Brittle-Ductile Transitions in Machining
K. Puttick 59

The Theory of Frictional, Elastic/Plastic Materials
I.F. Collins 71

A Phenomenological Constitutive Model for Ferromagnetic Materials Based on Rate-Independent Flow Theory
X.Q. Feng, D.N. Fang and K.C. Hwang 77

Unified Constitutive Model Considering Equivalence of Back Stress Due to Plastic and Viscoplastic Deformation
T. Mayama, K. Sasaki and H. Ishikawa 83

Constitutive Equation of Piezoelectric Ceramics Taking into Account Damage Development
M. Mizuno 89

An Expression of Plastic Anisotropy in Large Strain Range
M. Gotoh 95

Constitutive Modeling of Drawing and Extrusion with Cyclic Torsion
L.X. Kong and P. Hodgson 101

Constitutive Modeling and Material Instability
P.B. Béda and G. Béda 107

Fracture of Type 5083 Aluminum Sheet under Warm Stretch Bending
T. Naka, R. Hino and F. Yoshida 113

Modeling Brittle Damage Evolution in Forging/Extrusion Die
E.-. Yoh, Y.-. Kim and Y.S. Lee 119

Stress Field and Deformation around a Crack Tip Evaluated by Infrared Thermography and Fracture Strength of Welded Mild Steel Plates
I. Oda, A. Willett, M. Yamamoto, M. Miyawaki, N. Watanabe and I. Nakagawa 127

Deformation and Fracture Characteristics of Electron Beam Welded High Tensile Steel - Mild Steel Plates
I. Oda, A. Willett, T. Matsumoto, M. Yamamoto and Y. Sosogi 133

Inclusions and Fracture in Submerged Arc Welds of Carbon-Manganese Pressure Vessel Steels
C. Liu, D.O. Northwood and S.D. Bhole 139

Development of a Mesoscopic Cell Modeling the Damage Process in Steel at Elevated Temperature
S. Castagne, M. Remy and A.M. Habraken 145

Failure of Heat Exchanger Tubes Due to Localized Damage
M.M. Malik, I. Salam and A. Tauqir 151

Adaptive Delaunay Meshing Technique for Fracture Mechanics Problems
P. Dechaumphai, S. Phongthanapanich and P. Bhandhubanyong 157

An Elastoplastic Damage Model for Unsaturated Rock and Concrete
J.F. Shao, F. Bourgeois and O. Ozanam 163

FE-Meshless Coupling Method for 2D Crack Propagation
L.L. Lou and P. Zeng 169

Rate-Dependent Shear Deformation of Ductile Acrylic Adhesive and its Constitutive Modeling
M. Takiguchi, S. Izumi and F. Yoshida 175

Dynamic Strength and Strain Rate Sensitivity of 37 wt% Pb 63 wt% Sn Eutectic Solders
B. Wang, J. Zheng and D. Shu 181

Plasticity of Steel under Explosive Loading and the Effect on Cylindrical Shell Fragmentation
G. Szuladzinski 187

A Numerical Simulation of Axial Crushing of Tubular Strengthening Structures with Various Hat-Shaped Cross-Sections of Various Materials
M. Yamashita, M. Gotoh and Y. Sawairi 193

Technical Advantages of Hot Dynamic Compaction of Powders for Consolidating Diamond and Related Material Powders
K. Hokamoto, T. Tomoeda, H. Tsutsumi and M. Fujita 199

Extended Rate-Dependent Subloading Surface Model
K. Hashiguchi 205

Numerical Study of Dynamic Buckling of Steel Columns Subjected to Underground Explosion
H. Hao, H.K. Cheong and S. Cui 211

Elastic-Plastic Dynamic Response and Buckling of Steel Columns under Strong Vertical Ground Motion
S. Cui, H.K. Cheong and H. Hao 217

A Study of Inertia Effects under Impact Loading
S. Abdennadher and H. Zhao 223

Failure Analysis of Plastic Thin Spherical Shells under Local Impact
J.G. Ning, W.D. Song and H.Y. Liu 229

Experimental Investigation of the Second Critical Velocity of Dynamic Buckling of a Cylindrical Shell under Axial Impact
H.W. Ma, L.J. Zhang, G.W. Wang and Z.B. Cheng 235

On the Characteristics of Energy Absorption Control in Thin-Walled Members for the Use of Vehicular Structures
S.K. Kim, K.H. Im, Y.N. Kim, J.W. Park, I.Y. Yang and T. Adachi 239

Energy Absorption Characteristics of CFRP Composite Tubes under Axial Compression Load
Y.N. Kim, K.H. Im, S.K. Kim and I.Y. Yang 245

Energy Absorbing Capacity of Shock Absorbers Combining Rubber and Steel Pipes
M. Minagawa, Y. Doi and F. Nagashima 251

Reusable Collapsible Impact Energy Absorber
A.A.A. Alghamdi 257

Study of Loading Capacity and Energy Absorption Behaviours of W-Beam under Impact Loads
X.Q. Huang, Y.P. Liu and L.Q. Tang 263

Multiaxial Proportional and Non-Proportional Cyclic Behaviour of 40H Steel and PA6 Aluminium Alloy
Z.L. Kowalewski and K. Turski 269

Cyclic Plasticity of Precipitation-Hardenable Stainless Steel
T.H. Yip and Z.R. Wang 275

Effect of Plasticity Mismatch on Fatigue Crack Growth in Bimetallic Materials
P.R. Jia, G.Q. Jiao, N. Li and J. He 281

Investigation of Cyclic Elasto-Plastic Behavior of Copper Sheet
T. Uemori and F. Yoshida 287

Spatial Free Plastic Forming of Slender Parts - Finite Numerical Approach
M. Thalmair and H. Lippmann 293

An Investigation into the Influence of Deformable Dies on the Springback of Circular Plates
M. Kadkhodayan 299

Prediction of Springback in Anisotropic Sheet Metals Based on an Asymmetrical Non-Quadratic Yield Function
V.T. Nguyen, Z.P. Chen and P.F. Thomson 305

Study of Hydrostatic Extrusion Processes with Extra-High Extrusion Ratio
Y.M. Hwang and M.T. Yang 311

FE-Simulations of T-Shape Tube Hydroforming
Y.M. Hwang and Y.K. Lin 317

Indirect Extrusion with Active Friction (ISA)
K.B. Müller 323

Numerical Simulation of Sheet Metal Blanking Predicting the Shape of the Cut Edge
M. Rachik, J.M. Roelandt and A. Maillard 329

Inverse Finite Element Analysis of S-Rail Forming with a Direct Mesh Mapping Method for Crash Analysis Considering Forming Effects
S.H. Kim and H. Huh 335

A Rigid-Plastic Meshless Method for Forming Simulations
Y.M. Guo and K. Nakanishi 341

A Numerical Study of Double Stage Extrusion of a Circular Bar
M. Gotoh, M. Yamashita and K. Wakasugi 347

Deep Drawing of Nickel Foil and Stainless Steel Foil
Y. Marumo and H. Saiki 353

Study of Asymmetrical Cold-and-Hot Rolling of Three-Layer Bounded Clad Sheet
G.Y. Tzou, M.N. Huang, C.J. Chen, Y.C. Chiu and M.H. Ian 359

Finite Element Analysis for the Milli-Forming of Crystalline Materials with Damage
Y.S. Lee, Y.-. Kim and K.H. Na 365

An Elasto-Plastic Finite Element Analysis of the Axisymmetrical Tube-Nosing Process with a Conical Tool
Y.M. Huang and Y.M. Huang 371

Warm Forging of a Bevel Gear - On the Lubricating Characteristics of Lubricants
D.H. Kim, D.J. Jeong and B.M. Kim 377

Analysis of Multi-Pass Wet Wire Drawing Process and Pass Redesign
M.A. Kim, S.K. Lee, H.H. Jo and B.M. Kim 383

On Eccentric Spherical Forming of Metal Plate Using Underwater Shock Waves
H. Iyama, S. Nagano and S. Itoh 389

Prediction of Forming Limits for Voided Anisotropic Sheets Using Strain Gradient Dependent Yield Criterion
Y.S. Kim, H.S. Son, S.H. Yang and S.R. Lee 395

Research on 19MnCr5G Steel under Hot Metal Forming Conditions
W. Weroński, Z. Pater and A. Gontarz 401

Some Aspects of New Forming Process of Screw Spike
W. Weroński, A. Gontarz and Z. Pater 407

New Aspects of Orbital Forming Technology
S. Rusz and M. Greger 413

A 3-D Finite Element Analysis of the Rolling of Thin Strip with Friction Variation
Z.Y. Jiang and A.K. Tieu 419

FEM Simulation Study for Rapid Preforming of Axisymmetrical Forging by Differential Heating
M. Hua, S.Q. Lu, T.X. Yu and F.H. Osman (1) 425

Modelling of Friction Variation in Slab Edging with a Finite Element Approach
A.K. Tieu and C. Lu 431

A Novel Rolling-Annealing Cycle for Enhanced Deep Drawing Properties in IF Steels
L.K. Tung, M.Z. Quadir and B.J. Duggan 437

Experimental Study of the Effects of a Change of Tool Geometry on Blanked Edges of Fine-Blanked Parts
Y.C. Leung, L.C. Chan and T.C. Lee 443

Basic Research on Cold and Warm Forging of Microparts
U. Engel and E. Egerer 449

Effect of Process Parameters on Tubular Hydroformability
B.J. Kim, D.I. Hyun, S.M. Oak, S.K. Choi and Y.H. Moon 457

Workability in Rolling and Upsetting of Cast Chromium
Y. Harada, M. Ohmori, K. Mori and S. Maki 463

Prediction of Tool-Chip Interface Friction and Chip-Groove Effects in Machining with Restricted Contact Grooved Tools Using the Universal Slip-Line Model
X. Wang and I.S. Jawahir 469

Computational Fluid Dynamics (CFD) Simulation of Ultrahigh Velocity Abrasive Waterjet
H. Liu, J. Wang, R.J. Brown and N. Kelson 477

Evaluation of Machinability under Various Cutting Conditions in High-Speed Machining Using Ball Nose-End Mills - Effects of Cutter Orientation and Cutting Environments
C.M. Lee, S.W. Kim, D.W. Lee, E.-. Ng and D.K. Aspinwall 483

Investigation of Chip Formation Mechanism and Surface Integrity in High Speed Milling Titanium Alloy
M. Chen, G.L. Liu, F.H. Sun, X.G. Jian and R.W. Yuan 489

Theoretical and Experimental Research on Generation Mechanism of Grinding Wheel Topography by Laser Dressing and 3D Laser Scanning
M. Chen, F.H. Sun, G.L. Liu, X.G. Jian and X.T. Li 497

Studies of Adhesion and Roughness of Diamond Coated Drills and Influence on Cutting Performance
M. Chen, F.H. Sun, X.G. Jian, B. Hu and X.S. Liu 503

CBN Quill Grinding for 2-Dimensional Curved Surface
Q.S. Yan and Z.Q. Zhang 509

The Evolution of the Cube, Rotated Cube and Goss Recrystallization Textures in Rolled Copper and Cu-Mn Alloys
D.N. Lee, H.J. Shin and S.H. Hong 515

Micro-Morphology Generation in In-Vessel and Twin-Roll Castings under Magnetic Excitation by the Cellular Automaton Approach
T. Tsuta, T. Iwamoto and B. Wang 521

Observation of the Tensile Deformation Behavior of Polycrystalline Titanium with the Scanning Probe Microscope
T. Abe, Y. Li and N. Tada 529

Orientation Change Measured by the EBSD Method and the Plastic Deformation of Grains in Polycrystalline Copper
T. Abe, R. Kondou, N. Tada and I. Shimizu 535

Analysis of Plastic Deformation with Crystal Slips Using Rigid-Plastic FEM
T. Abe and N. Nagayama 541

Experimental Research on Deformation of Ti-Ni SMA under Complex Loading Conditions
K. Hashimoto, M. Tokuda, T. Inaba, A. Shiode, P. Šittner and B. Bundara 547

Experimental Research on Two-Way Shape Memory Effect of Cu-Based SMA Polycrystal
T. Inaba, M. Tokuda, S. Sugino, T. Warita, P. Šittner and B. Bundara 553

Surface Roughening and Microscopic Inhomogeneous Deformation of Polycrystalline Metal during Plastic Torsion
I. Shimizu, T. Abe, N. Kaino and M. Kai 559

Texture Evolution during Deep Drawing of Mo Sheet
K.K. Park, J.H. Cho, H.N. Han, H.C. Lee and K.H. Oh 567

An Investigation into the Formation of Microbands and Shear Bands in IF Steel
Q.Z. Chen, K. Shen, G.J. Shen and B.J. Duggan 573

Effects of Pressing Temperature and Initial Microstructure on the Equal Channel Angular Pressing of Ti-6Al-4V Alloy
Y.G. Ko, Y.H. Lee, W.S. Jung, D.H. Shin and C.S. Lee 579

Criteria for Plastic Deformation and Crack Initiation in Monocrystalline Silicon
H. Tanaka, S. Shimada and N. Ikawa 585

Molecular Dynamics Study of Interface Generated between Atomic Clusters
K. Saitoh 591

Equivalent Continuum for Discrete Molecular Dynamic Systems
M. Zhou 597

A Stress Criterion for the β-Sn Transformation in Silicon under Indentation and Uniaxial Compression
W.C.D. Cheong and L.C. Zhang 603

Effect of Water on the Mechanical Response of Monocrystalline Silicon to Repeated Micro-Indentation
I. Zarudi, L.C. Zhang and M.V. Swain 609

Atomistic Deformation of Silicon under Triaxial Stresses
K. Mylvaganam and L.C. Zhang 615

Constitutive Modelling of Multi-Phase Transformation of Silicon under Nano-Scale Deformation
T. Vodenitcharova, L.C. Zhang and T.X. Yu 621

Assessment of Geometrical Orientation of Martensitic Particles in TRIP Steel by Fourier and Wavelet Transformation Image Analysis
T. Iwamoto and T. Tsuta 627

Finite Element Analysis of Transformation Behavior of an Fe-Based Shape Memory Alloy
F. Nishimura 637

Microstructure Transformation, Precipitation and Mechanical Properties of Nb Micro-Alloyed Shipbuilding Steel Plate EH36 Subjected TMCP
W.H. Sun, A.K. Tieu, Z.Y. Jiang and H. Li 643

Modeling of Phase Transformation in a Transversely Isotropic SMA Rod
Z. Zhong, X.B. Yu, Q.P. Sun, T.X. Yu and H.C. Huang 649

The Role of Carbon in the Phase Stability of 3Y-TZP at Low Temperatures
Z.B. Zhao, C. Liu and D.O. Northwood 655

Thermal Stability and Phase Transformation of the Hot-Rolled TRIP Steels Exposed to Coiling Temperatures of 350 to 500 C
H.J. Jun, S.H. Park, S.D. Choi and C.G. Park 661

Deformation-Induced Martensitic Transformation under Various Deformation Modes
H.C. Shin, T.K. Ha, W.J. Park and Y.W. Chang 667

Characterization of Micro-To Macroscopic Deformation Behavior of Amorphous Polymer
Y. Tomita and M. Uchida 673

Fabrication of SiC_p/Al Composite Billets by Horizontal Continuous Casting and their Mechanical Properties
C.G. Kang, S.W. Youn and P.K. Seo 679

Micro-Forming of PMMA for Optical Components
K. Hanada, Y. Hashiura, R. Maeda, T. Sano and H. Negishi 685

In-Plane Elastic-Viscoplastic Behavior of Long Fiber-Reinforced Laminates: Analysis Based upon Homogenization Theory
T. Matsuda, H. Tanaka and N. Ohno 691

Thixoforging Process for Development of Composites Cylinder Linear and their Mechanical Properties
S.W. Youn, P.K. Seo and C.G. Kang 697

Finite Element Analysis of Forming Flow Stability in Thermoplastic Composite Sheet Forming
H.R. Daghyani, M.T. Abadi and S. Fariborz 703

Plastic Limit Analysis of Defective Pipelines under Complex Loads
B.Y. Xu, Y.H. Liu and B. Yang 709

Deformation Behavior of Nanocrystalline Zn-22wt%Al Alloy Using Thermomechanical Controlling Process
T. Tanaka, K. Makii, A. Kushibe and K. Higashi 719

Rubbing Contact between Rotating Blade and Casing Plate, Part 1 – Experimental Study
B. Wang, J. Zheng and G.X. Lu 725

A Tube under Transverse Loading – FEM and Experiment
D.W. Shu 731

Collapse Analysis of Auto-Body Structures Considering the Effect of Fabrication
K.P. Kim and H. Huh 737

Prediction of Hot Strength of Steels with Advanced Models
L.X. Kong and P. Hodgson 743

Finite Element Model Satisfying Zero Volume Flow Rate Leaking from the Surface of Stream-Tube in 3-Dimensional Steady State Analyses
S. Toyoshima and M. Gotoh 749

Mechanical Properties of Fine-Grained P/M Aluminum
J. Ma, W.Y. Lee, W. Cheng and G.E.B. Tan 755

The Influence of Plasticity on the Local Buckling Behaviour of a Cylinder with Discrete Stringer Stiffeners Above Local Supports
W. Vanlaere, J. Belis, P. Buffel, G. Lagae and R. Van Impe 761

Deformation Behaviour of a Cylinder under Simultaneous Compression and Torsion
X. Ma, M.R. Barnett and Y.H. Kim 767

The Influence of Non-Dissipative Quantities in Kinematic Hardening Plasticity
M. Wallin, M. Ristinmaa and N.S. Ottosen 773

Viscoplastic Deformation of Lead-Free Solder Alloy - Experiments and Simulations
K. Sasaki, A. Yanagimoto and H. Ishikawa 779

Viscoplastic Stress Analysis of Shrinkage and Warping in Graded Layers during Sintering
K. Shinagawa and Y. Hirashima 785

Influence of Plastic Deformation of the Heat Affected Zone on the Mechanical Behaviour of Welds in High Strength Steels
D.M. Rodrigues, L.F. Menezes, A. Loureiro and J.V. Fernandes 791

FEM Analysis of Elasto-Plastic Deformation and Anisotropy in Two Neighbouring Holes in Sheet Metal
Y. Nakayama 797

Life Assessment of Udimet 720Li Thin Diaphragm Disc Using a Viscoplastic Material Model
J.T. Yeom, N.K. Park and S.J. Williams 803

Numerical Analysis of Residual Stresses Induced by Low Plasticity Burnishing
W. Zhuang and B. Wicks 809

An Investigation of the Influence of Pre-Strain on Material Properties of Sheet Brass
K.P. Rao and E.V.R.K. Mohan 815

Impact of Finish-Forging Temperature on Structure and Properties of Micro-Alloyed Steels
M. Greger and S. Rusz 821

Thermo-Mechanical Finite Element Model of Shell Behavior in the Continuous Casting of Steel
C.S. Li and B.G. Thomas 827

In Situ Deformation Behavior Study during Uniaxial Tension of Aluminium Alloys Using a High Resolution EBSD
J.H. Han, K.H. Oh and Y.H. Chung 835

Modeling Anisotropic Behaviour for Steel Sheets Using Different Yield Criteria
T. Kuwabara, D.S. Comsa, D. Banabic and E. Iizuka 841

Plastic Asymmetry and Anomaly of Iron Aluminides - An Internal Variable Approach
W.K. Bang, H.T. Lim, T.K. Ha and Y.W. Chang 847

Multi-Axial Deformation Behavior and its Constitutive Equations for Superplastic Materials
M. Tokuda, T. Inaba, A. Kurakake, S. Ikushima, S. Makino and F.U. Enikeev 853

Diffusion Bonding in Commercial Superplastic AZ31 Magnesium Alloy Sheets
H. Somekawa and K. Higashi 857

Experimental Study of the Superplasticity of Mg Alloy
S. Ikushima, M. Tokuda, T. Inaba, A. Kurakake and F.U. Enikeev 863

Cavitation of Superplastic AA5083 during Rapid Gas Forming
Y.H. Yu, S. Lee and B. Ou 869

Fabrication of Low Temperature Superplastic AZ91 Mg Alloys Using Simple High-Ratio Extrusion Method
H.K. Lin and J.C. Huang 875

Phase Evolution and Mechanical Behaviour of Super α_2 Ti_3Al Base Alloys during Superplastic Deformation at Lower Temperatures of 700-900°C
K.L. Yang, J.C. Huang and Y.N. Wang 881
