Table of Contents

Preface

Polycrystalline Silicon Thin-Film Transistors on Flexible Steel Foil Substrates for Complementary-Metal-Oxide-Silicon Technology
M. Wu, J.C. Sturm and S. Wagner 3

High Temperature Crystallized Poly-Si on Molybdenum Substrates for Thin-Film Transistor Application
J.H. Park, D.Y. Kim, J.K. Ko and J. Yi 13

Poly-Si Thin-Film Transistors Robust Against Hot-Carrier Stress and Application to Liquid Crystal Displays Fabricated by a 450°C Process
T. Shiba, M. Hatano, M. Matsumura, Y. Toyota, Y. Tai, M. Ohkura, T. Miyazawa and T. Itoga 19

Hot Carrier Effect in Low-Temperature Poly-Silicon p-Channel Thin-Film Transistors
H. Nakagawa, H. Yano, T. Hatayama, Y. Uraoka, T. Fuyuki and Y. Morita 31

Polycrystalline Silicon Thin-Film Transistors Fabricated by Defect Reduction Methods
H. Watakabe, M. Suzuki and T. Sameshima 37

Reliability of Low-Temperature Poly-Si Thin-Film Transistors
Y. Inoue, H. Ogawa, T. Endo, H. Yano, T. Hatayama, Y. Uraoka and T. Fuyuki 43

Defect Control Process Technologies for High-Performance Polycrystalline Si Thin-Film Transistor Fabrication
S. Higashi, D. Abe, Y. Hiroshima, K. Miyashita, T. Kawamura, S. Inoue and T. Shimoda 49

Polysilicon Thin-Film Transistors Based on Frequency Doubled cw-Nd: YVO_4 Laser Crystallized Silicon
A. Saboundji, J.F. Michaud, T. Mohammed-Brahim, F. Le Bihan, G. Andrä, J. Bergmann and F. Falk 55

High Quality Polycrystalline Silicon Thin Film Transistors Fabricated from Laser-Irradiated Sputtered Si Films
T. Serikawa 61

Behavior of Polysilicon Thin-Film Transistors at Different Temperatures
J.F. Llibre, H. Toutah, B. Tala-Ighil, B. Boudart, T. Mohammed-Brahim and O. Bonnaud 67

Gate-Insulator Film Deposition by Remote Plasma Chemical Vapour Deposition for Low-Temperature Poly-Si Thin-Film Transistors
Y. Murata, M. Itoh and S. Morozumi 73

Analytical Current-Voltage Model for Polycrystalline Silicon Thin-Film Transistors
M. Kimura, T. Takizawa, M. Miyasaka, S. Inoue and T. Shimoda 79

Very Thin Amorphous and Microcrystalline Silicon Films Deposited by Hot-Wire Chemical Vapour Deposition for Photovoltaic Applications
U. Weber, C. Mukherjee, M. Kupich and B. Schröder 87

Low-Temperature Formation of Polycrystalline Silicon and Its Device Application
H. Fujiwara, Y. Nasuno, M. Kondo and A. Matsuda 99

High-Density Microwave Plasma-Enhanced Chemical Vapor Deposition of Crystalline Silicon Films for Solar Cell Devices
H. Shirai, G. Ohkawara and M. Nakajima 109

Correlation between Microstructure and Electronic Property of Solar-Grade Poly-Si Thin-Films Deposited on Textured Substrates
R. Muhida, T. Matsui, T. Kawamura, T. Harano, T. Toyama, H. Okamoto, S. Honda, H. Takakura and Y. Hamakawa 115

Low-Temperature Epitaxy on Polycrystalline Silicon Substrates
T.A. Wagner, L. Oberbeck, R.B. Bergmann, M. Nerding, H.P. Strunk and J. Werner 121

Cu(In,Ga)Se_2 Solar Cells on Flexible Stainless-Steel Foils
T. Satoh, Y. Hashimoto, S. Shimakawa and T. Negami 127

Cathodoluminescence Studies of Cu(In,Ga)Se_2 Thin-Films
N. Ott, G. Hanna, M. Albrecht, U. Rau, J. Werner and H.P. Strunk 133

Dependence of Hole Concentration in p-Type Silicon Solar Cell Wafers on Temperature and on Position within the Polycrystalline Ingot
H. Matsuura, T. Ishida, K. Nishikawa, N. Fukunaga and T. Kuroda 141

Light-Induced Lifetime Degradation of Multicrystalline Silicon Wafers and Solar Cells
M. Dhamrin, H. Hashigami and T. Saitoh 147

A Study on Impurities in Poly-Si Wafers Obtained from Vacuum Casting and their Effect on Solar Cell Efficiency
A. Suparerk, J.S. Shin, G.H. Lee, Z.H. Lee, K.I. Bang and K.S. Lim 153

Defects in Polycrystalline Silicon Thin-Films Crystallized by Solid Phase and Excimer Laser Annealing
K. Kitahara, K. Ohnishi, Y. Katoh, K. Watakabe and A. Moritani 161

Optical and Electronic Properties of Laser Crystallized Poly-Si
K. Brendel and N.H. Nickel 167

Tailoring Texture in Laser Crystallization of Silicon Thin-Films on Glass
M. Nerding, S. Christiansen, R. Dassow, K. Taretto, J.R. Köhler and H.P. Strunk 173

Lateral Crystalline Grain Growth by Combination of Laser Irradiation with Rapid Substrate Heating
N. Andoh and T. Sameshima 179

New Method to Form High-Quality Poly-Si Film by Selectively Enlarging Laser Crystallization
M. Tai, M. Hatano, S. Yamaguchi, S.K. Park, T. Noda, M. Hongo, T. Shiba and M. Ohkura 185

Hydrogen Bonding and Grain-Boundary Defects in Laser Crystallized Poly-Si
N.H. Nickel and K. Brendel 191

Super-Grain Poly-Si by Metal Induced Crystallization of Amorphous Silicon
J. Jang 199

Metal-Induced Lateral Crystallization of Amorphous Silicon under Reduced Nickel Supply
K. Makihira, H. Nozaki, T. Asano and M. Miyasaka 207

Structural Properties of Nickel-Metal-Induced Laterally Crystallized Silicon Films
M. Miyasaka, K. Makihira, T. Asano, B. Pécz and J. Stoemenos 213

High-Temperature Crystallization of Amorphous Silicon on a Molybdenum Substrate
D.Y. Kim, J.K. Ko, J.H. Park, U. Gangopadhyay and J. Yi 219

Rapid Joule Heating with Metal Films Used to Crystallize Silicon Films
Y. Kaneko and T. Sameshima 225

Low-Temperature Crystallization of Poly-SiGe Thin-Films by Solid Phase Crystallization
K. Nakahata, M. Isomura and K. Wakisaka 231

Influence of Thermal Electron Irradiation on Crystallization of a Growing Si Film on a Glass Substrate
S. Horita, S. Miyoshi and O. Jaike 237

Solution Growth of Polycrystalline Silicon on Quartz Glass Substrates
R. Kamada, C. Wen, J. Otomo and H. Takahashi 243

Crystal Structure Analysis of Spherical Silicon Using X-Ray Pole Figures
S. Omae, C. Okamoto, H. Takakura, Y. Hamakawa and M. Murozono 249

Microcrystalline Silicon Thin-Films Grown by Plasma Enhanced Chemical Vapour Deposition - Growth Mechanisms and Grain Size Control
P. Roca i Cabarrocas, A. Fontcuberta i Morral, B. Kalache and S. Kasouit 257

Self-Limiting Formation and Optical Properties of Hemispherical Grains of Microcrystalline Silicon on an Amorphous Silicon Film Surface
H. Akazawa 269

Low-Temperature Formation of Si-Nanocrystal Dots from Chlorinated Materials by Radio-Frequency Plasma-Enhanced Chemical Vapor Deposition and Optical Properties
H. Shirai, T. Tsukamoto and K. Kurosaki 275

Deposition and Characterization of Polycrystalline Silicon Thin-Films by Reactive Thermal Chemical Vapour Deposition at 450°C
J.W. Lee, K. Shimizu and J. Hanna 281

Growth of Highly <100>-Oriented Crystalline Silicon Thin Films on Molybdenum by Pulsed DC Magnetron Sputtering
P. Reinig, F. Fenske, A. Schöpke, B. Selle, W. Fuhs, M. Nerding and H.P. Strunk 287

Characterization of Laser Ablated GaN/ZnO Bilayer on Si(111)
R.P. Wang and H. Muto 295

Role of Potential Barriers in Epitaxial Layers of Semi-Insulating GaN Layers
J.V. Vaitkus, E. Gaubas, S. Sakai, Y. Lacroix, T. Wang, K.M. Smith, M. Rahman and W. Cunningham 301

Characterization of Polycrystalline GaN Layers Grown on Alkali-Metal-Free Glass Substrates by Molecular-Beam Epitaxy Assisted by Electron Cyclotron Resonance Plasma
T. Yodo, T. Hirano and Y. Harada 307

Properties of Polycrystalline Cu_2O Thin-Films Doped with N or Si as an Acceptor Dopant
S. Ishizuka, Y. Okamoto and K. Akimoto 313

Electronic Surface Properties of Ultrahigh Vacuum Grown Polycrystalline $CuGaSe_2$
S. Sadewasser, K. Ishii, T. Glatzel and M.C. Lux-Steiner 319

Microanalysis of Epitaxially Grown Diamond Tip Array
H.W. Chen and V. Rudolph 325

Effects of Grain Boundary Structure and Chemistry on Electrical Activity in Polycrystalline Silicon
S. Tsurekawa and T. Watanabe 333

Local Electrical Properties of Non-Doped Polycrystalline Silicon Thin-Films Evaluated Using Conductive Atomic Force Microscopy
Y. Aya, A. Andoh, S. Yamasaki and K. Wakisaka 339

Effects of Oxidation and Annealing Temperature on Grain Boundary Properties in Polycrystalline Silicon Probed Using Nanometre-Scale Point-Contact Devices
T. Kamiya, Y. Furuta, Y. Tan, Z.A.K. Durrani, H. Mizuta and H. Ahmed 345

Evaluation of Recombination Velocity at Grain Boundaries in Poly-Si Solar Cells with Laser Beam Induced Current
N. Sakitani, K. Nishioka, T. Yagi, Y. Yamamoto, Y. Ishikawa, Y. Uraoka and T. Fuyuki 351

Study on Grain Boundary Formation in a Si Film Crystallized by Laser-Induced Periodic Temperature Distribution with a High Incident Angle
H. Kaki, Y. Nakata and S. Horita 355

Formation of Extended Defects in Polycrystalline SiGe by Electron Irradiation
J. Kikkawa, J. Yamasaki, Y. Ohno, M. Kohyama and S. Takeda 361

Terahertz Generation Study of Ultrafast Carrier Dynamics in Polycrystalline Low-Temperature GaAs
N. Kawasaki, T. Yoshimura, M. Tonouchi, M. Tani, K. Sakai and H. Katahama 367

Atomistic Simulation Study of Dislocations and Grain Boundaries in Nanoscale Semiconductors
K. Masuda-Jindo, R. Kikuchi, S. Obata and M. Menon 375

Molecular Dynamics Studies of Crystallization and Grain Boundary Formation in Silicon
K. Sugio and H. Fukushima 381

Theoretical Study of the Atomic and Electronic Structure of Grain Boundaries in SiC
M. Kohyama and K. Tanaka 387

First-Principles Calculation of 3C-SiC(111)/Al Nano-Hetero Polar Interfaces
S. Tanaka and M. Kohyama 393

A Simple Method to Extract the Diffusion Length from the Output Parameters of Solar Cells - Application to Polycrystalline Silicon
K. Taretto, U. Rau, T.A. Wagner and J. Werner 399

Numerical Studies of Polycrystalline Silicon Film Growth
Y. Kobayashi and K. Satake 405

Mechanisms Controlling Preferred Orientation of Chemical Vapour Deposited Polycrystalline Films
Y. Kajikawa, S. Noda and H. Komiyama 411

Single-Electron Charging Phenomena in Nano/Polycrystalline Silicon Point Contact Transistors
H. Mizuta, Y. Furuta, T. Kamiya, Y. Tan, Z.A.K. Durrani, K. Nakazato and H. Ahmed 419

Towards Complementary Metal-Oxide-Silicon Thin-Film Devices with a New Structure
G. Gautier, C.E. Viana, S. Crand, R. Rogel, N.I. Morimoto and O. Bonnaud 429

Electrical Properties of High Value Doped Polysilicon-Based Resistors
E. Carvou, F. Le Bihan, A.C. Salaün, R. Rogel, O. Bonnaud, Y. Rey-Tauriac, X. Gagnard and L. Roland 435

Fabrication and Characterization of Ultra-Small Polycrystalline Silicon Islands for Advanced Multi-Level Silicon-On-Insulator Applications
D. Schmidt and P. Pianetta 441

Simple Fabrication of Mg_2Si Thermoelectric Generator
T. Hosono, Y. Matsuzawa, M. Kuramoto, Y. Momose, H. Tatsuoka and H. Kuwabara 447

Silicon Films Deposited by Low-Pressure Chemical Vapour Deposition for Microsystems
H. Mahfoz-Kotb, A.C. Salaün, T. Mohammed-Brahim, F. Bendriaa, F. Le Bihan and O. Bonnaud 453
Sensitivity Improvement of Polysilicon Thin-Film Transistor-Based Magnetic Sensors
E. Carvou, F. Le Bihan, R. Rogel and O. Bonnaud 459
