ISBN(softcover): 978-3-908450-63-4 ISBN(eBook): 978-3-0357-0706-9

Table of Contents

Preface

Charge Transport in Polycrystalline Organic Field-Effect Transistors
G. Horowitz 3

High Quality Textured C_{60} Thin Films on a Mica Substrate: Growth, Crystalline Structure, Electrical and Photoelectric Properties
E.A. Katz, D. Faiman, S. Shtutina, A. Isakina, K. Yagotintsev and K. Iakoubovskii 15

Electrical Properties of Grain Boundaries in Titanate Ceramics
R. Hagenbeck 21

Local Potential at Atomically Abrupt Oxide Grain Boundaries by Scanning Probe Microscopy
D.A. Bonnell and S.V. Kalinin 33

Large-Area Polycrystalline p-Type Silicon Films Produced by the Hot Wire Technique
I. Ferreira, R. Martins, A. Cabrita, F.M. Braz Fernandes and E. Fortunato 47

The Influence of the Use of Different Catalyzers in Hot-Wire CVD for the Deposition of Polycrystalline Silicon Thin Films
P.A.T.T. van Veenendaal, J.K. Rath, O.L.J. Gijzeman and R.E.I. Schropp 53

Boron-Doped Polysilicon: Growth Kinetics and Structural Study of Low-Pressure Chemical Vapour Deposited Films in the Case of High Doping Levels
B. Caussat, E. Scheid, B. Legros-de Mauduit and R. Berjoan 59

Quasi-Epitaxial Growth of Silicon Layers by Hydrogen Reactive Magnetron Sputtering at Temperatures as Low as 200 °C
Y. Leconte, R. Rizk, F. Gourbilleau, P. Voivenel, M. Lejeune and C. Goncalves 65

Effects of Ion Bombardment upon Microcrystalline Silicon Growth
B. Kalache, R. Brenot, V. Tripathi, S. Kumar, R. Vanderhaghen and P. Roca i Cabarrocas 71

Nucleation and Growth of Hydrogenated Microcrystalline Silicon Films: New Insights from Scanning Probe Microscopies
J. Herion and C. Ross 77

Poly-Crystallized SiGe Thin Films in a Low-Temperature Process
T. Noguchi 83

Effect of Pressure and Temperature on the Electrical Properties of LPCVD Silicon-Germanium Thin Films
D. Guillet, M. Sarret, H. Lhermite and O. Bonnaud 89

Intra-Grain Defects - Limiting Factor for Low-Temperature Polycrystalline Silicon Films?
T.A. Wagner, L. Oberbeck, R.B. Bergmann and J. Werner 95

Structural Effects in Ultra-Thin Iridium Silicide
U. Hörmann, T. Remmele, C. Schür, M. Albrecht, H.P. Strunk, H. Grünleitner and M. Schulz 101

Hydrogen Diffusion through Deformed Si-Si Bonds at Grain Boundaries in Hot-Wire CVD Polycrystalline Silicon Films
J.K. Rath, R.E.I. Schropp and W. Beyer 109

Point Defects in Carbon-Rich Polycrystalline Silicon
B. Pivac, I. Kovačević and V. Borjanović 115

Hydrogen Penetration into Si under Wet Chemical Etching: Experiment and Simulation
O.V. Feklisova, E.B. Yakimov and N. Yarykin 121

Comparison of Deposited Polycrystalline Films and Crystallized Silicon from a-Si:H Films
G. Farhi, R. Cherfi, M. Aoucher and K. Zellama 127

Visible Electroluminescence from an ITO/ZnS:Mn/n-Si Device
T. Hirate, M. Ueda and T. Satoh 133

Properties Presented by Tin Oxide Thin Films Deposited by Spray Pyrolysis
P. Nunes, E. Fortunato, P.M. Vilarinho and R. Martins 139

Structural, Optical and Electrical Properties of Natively Textured ZnO Grown by PECVD for Thin-Film Solar Cell Applications
J. Löffler, R. Groenen, P.M. Sommeling, J. Lindén, M.C.M. van de Sanden and R.E.I. Schropp 145

Effect of Deposition Conditions upon Gas Sensitivity of Zinc Oxide Thin Films Deposited by Spray Pyrolysis
P. Nunes, E. Fortunato, P.M. Vilarinho and R. Martins 151

Defects in Chlorine-Doped CdTe Thin Films
V. Valdna, J. Hiie and A. Gavrilov 155

Heterogeneous Nucleation in Excimer-Laser Melted Si Thin-Films
R. Ishihara and F.C. Voogt 163

Excimer Laser Crystallized Poly-Si Thin-Film Transistors on a Plastic Substrate with Mobility of 250 cm^2/V.s
D.P. Gosain, A. Machida, S. Usui and M. Arai 169

Morphological Characterization of Polysilicon Films Laser-Annealed in Argon Ambient
Y. Helen, G. Gautier, K. Mourgues, F. Raoult, T. Mohammed-Brahim, R. Rogel, O. Bonnaud, C. Prat and D. Lemoine 175

Excimer Laser Crystallization of Doped and Undoped a-Si:H for Solar Cells
P. Lengsfeld, S. Christiansen, M. Nerding, M. Rebien, W. Henrion, I. Sieber and N.H. Nickel 181

Laser-Crystallisation of Amorphous Si Layers and Two-Dimensional Simulations of the Process Dynamics
M. Nerding, S. Christiansen, S. Vogler, G. Andrä, F. Falk and H.P. Strunk 187

Raman Spectroscopy of Ultra-Heavily Doped Laser-Crystallized Polycrystalline Silicon Films
N.H. Nickel, P. Lengsfeld and I. Sieber 193

Influence of Thermal Treatments on the Crystallisation of LPCVD-Deposited Si Thin Films
A. Bachrouri, A. Romano-Rodríguez, J.L. Alay, A. Vilà, J.R. Morante, H. Kotb, R. Rogel, Y. Helen, T. Mohammed-Brahim, M. Sarret and O. Bonnaud 199

Laser Crystallisation of Silicon-Germanium Alloys
C. Eisele, C.E. Nebel and M. Stutzmann 205

Microcrystalline Silicon - Relation between Transport and Microstructure
J. Kočka, H. Stuchlíková, J. Stuchlík, B. Rezek, V. Švrček, P. Fojtík, I. Pelant and A. Fejfar 213

Barrier-Controlled Transport in Highly Doped Microcrystalline Silicon: Role of Interface States
S. Brehme, P. Kanschat, T. Weis, K. Lips and W. Fuhs 225

Atomistic Simulation Study of Grain Boundaries and Dislocations in Nanoscale Semiconductors
K. Masuda-Jindo, M. Menon and R. Kikuchi 231

Highly Crystalline Intrinsic Microcrystalline Silicon Films Using $SiF_4/Ar/H_2$ Glow Discharge Plasma
S. Kumar, R. Brenot, B. Kalache, V. Tripathi, R. Vanderhaghen, B. Drevillon and P. Roca i Cabarrocas 237

Charge Storage Effects in Si Nanocrystals Embedded in SiO_2 Thin Films
O. González-Varona, B. Garrido, A. Pérez-Rodríguez, C. Bonafos, J. Montserrat and J.R. Morante 243

Photoluminescence Features of Si/SiO_2 Superlattices Produced by Reactive Magnetron Sputtering
C. Ternon, F. Gourbilleau, X. Portier, P. Voivenel, R. Madelon and R. Rizk 249

Present Status and Future Prospects of Polycrystalline Thin-Film Solar Cells in Japan
M. Konagai 257

Polysilicon Thin-Film Solar Cells: Influence of the Deposition Rate upon Enhanced Diffusion and on Cell Performance
G. Beaucarne, M. Caymax, I. Peytier and J. Poortmans 269

Structural Properties and Growth Mechanism of $CuGaSe_2$ Thin Films for Solar Cells Grown by Two-Source CVD
D. Fischer, T. Dylla, A.M. Sembian, A. Jäger-Waldau and M.C. Lux-Steiner 275

N-Type Pyrite Thin Films Obtained by Doping with Titanium
I.J. Ferrer, J.R. Ares and C.R. Sánchez 281

Properties of $CuInSe_2$ Polycrystalline Thin Films Prepared by Selenization of Co-Sputtered Cu-In Alloys
E.P. Zaretskaya, V.F. Gremenok, V.B. Zalesski, R.W. Martin, V.A. Ivanov, I.A. Victorov, M.V. Yakushev, O.V. Ermakov and F.V. Kurdesau 287

Photosensitive Properties of $CuIn_xGa_{1-x}Te_2$/n-InSe Structures
E.P. Zaretskaya, V.F. Gremenok, Y.V. Rud', V.Y. Rud', I.V. Bodnar, K. Bente, W. Schmitz, I.A. Victorov, R.N. Bekimbetov and G. Kommichau 293

Grain Boundary Recombination in Thin-Film Silicon Solar Cells
J. Werner, K. Taretto and U. Rau 299

Numerical Simulation of the Electrical Conduction in a P-N Junction Under Solar Lighting: Application to CdZnS(n^+)/CdTe(p) Heterostructure
A. Joti, Z. Benamara, F.S. Bachir Bouiadjra and N. Bachir Bouiadjra 305

Two-Dimensional Simulations of Microcrystalline Silicon Solar Cells
K. Taretto, U. Rau and J. Werner 311

Numerical Modeling and Simulation of Output Parameters in Poly-Si Homojunction nip (or pin) Solar Cells
B. Zebentout, H. Sehil, Z. Benamara, H. Dib, T. Mohammed-Brahim and O. Bonnaud 317

Polycrystalline Silicon Thin-Film Transistors
S. Wagner, M. Wu, B.R. Min and I. Cheng 325

Single-Crystalline Regions of Silicon-on-Glass for Thin-Film Transistors
G. Andrä, J. Bergmann, S. Christiansen, F. Falk, M. Nerding and N.D. Sinh 337

Correlation between the Ageing and the Grain Size of Polysilicon Thin-Film Transistors
H. Toutah, B. Tala-Ighil, J.F. Llibre, T. Mohammed-Brahim, Y. Helen, G. Gautier, K. Mourgues and F. Raoult 343

Analysis of Hot Carrier Effect in Low-Temperature Poly-Si Thin-Film Transistors towards High Reliability
T. Fuyuki and Y. Uraoka 349

Low-Temperature Plasma-Processed Microcrystalline Silicon Thin Films for Large-Area Electronics
P. Roca i Cabarrocas, S. Kumar, V. Tripathi, P. Bulkin, R. Brenot, B. Drévillon, R. Vanderhaghen and I. French 361

Electrical and Noise Characterization of Large-Grain Polycrystalline Silicon Thin-Film Transistors
F.V. Farmakis, D.M. Tsamados, J. Brini, G. Kamarinos and C.A. Dimitriadis 367

Accumulation Mode in Polycrystalline Silicon Thin-Film Transistors
Y. Bourezig, H. Sehil, B. Zebentout, Z. Benamara, F. Raoult and O. Bonnaud 373

Simulation of the Backward Current in Polycrystalline Silicon Thin-Film Transistors
M. Baudet, H. Lhermite and T. Mohammed-Brahim 379

Addressing of Organic Electroluminescent Displays
D. Pribat and F. Plais 385

Low-Pressure Chemical Vapor Deposition of Semi-Insulating Polycrystalline Silicon (SIPOS) and its Analysis: Application to Power Diode Passivation
E.S. Ferreira and N.I. Morimoto 391

Nanocrystalline Silicon Carbide: Structure, Properties and Application to SiC/Si Heterostructure Devices
S. Kerdiles, R. Rizk, D. Grebille, L. Pichon and O. Bonnaud 397

Mechanical Properties of Thin and Thick Polysilicon Films for Microsystem Applications
J.R. Morante 405

Porous Silicon in Microsystems: Thermal Isolation Applications
S. Périchon, V. Lysenko, B. Remaki and D. Barbier 417

Thin-Film Microelectromechanical Devices on Large-Area Substrates
V. Chu, J.P. Conde, M. Boucinha, J. Gaspar and P. Brogueira 429

Manufacturing of Precise SiC Components by Nd:YAG Laser Radiation
E.W. Kreutz, R. Weichenhain, A. Horn and R. Poprawe 441

Polycrystalline Silicon as a Material for Magnetic Sensors: Application to Hall and TFT-Hall Cells
F. Le Bihan, E. Carvou, R. Rogel, A.C. Salaün, B. Fortin and O. Bonnaud 447
